

# Caring for life's journeys

## **We are MTR**

MTR represents more than transporting people from A to B. We are also involved in developing the communities where we operate.

This concept has established us as one of the world's leading railway companies and will enable us to continue to grow and develop in the future.

MTR evolves continuously with the people working with us, the operations we run and with the world around us. However, MTR's vision, mission and values last.

# Our trip takes us from Hong Kong...

...to the suburbs of  
Stockholm

We are the lifeblood  
of the community  
that makes it easy for  
people to meet

Our **VISION** is to be a leading multinational company that connects and grows sustainable communities with caring service.

A woman with blonde hair, wearing a dark green coat over a red patterned top, is sitting on a train. She is looking out the window to her right with a thoughtful expression, her hand resting on her chin. The train interior is visible, including a yellow handrail and a blue patterned seat. The background outside the window is blurred, suggesting motion.

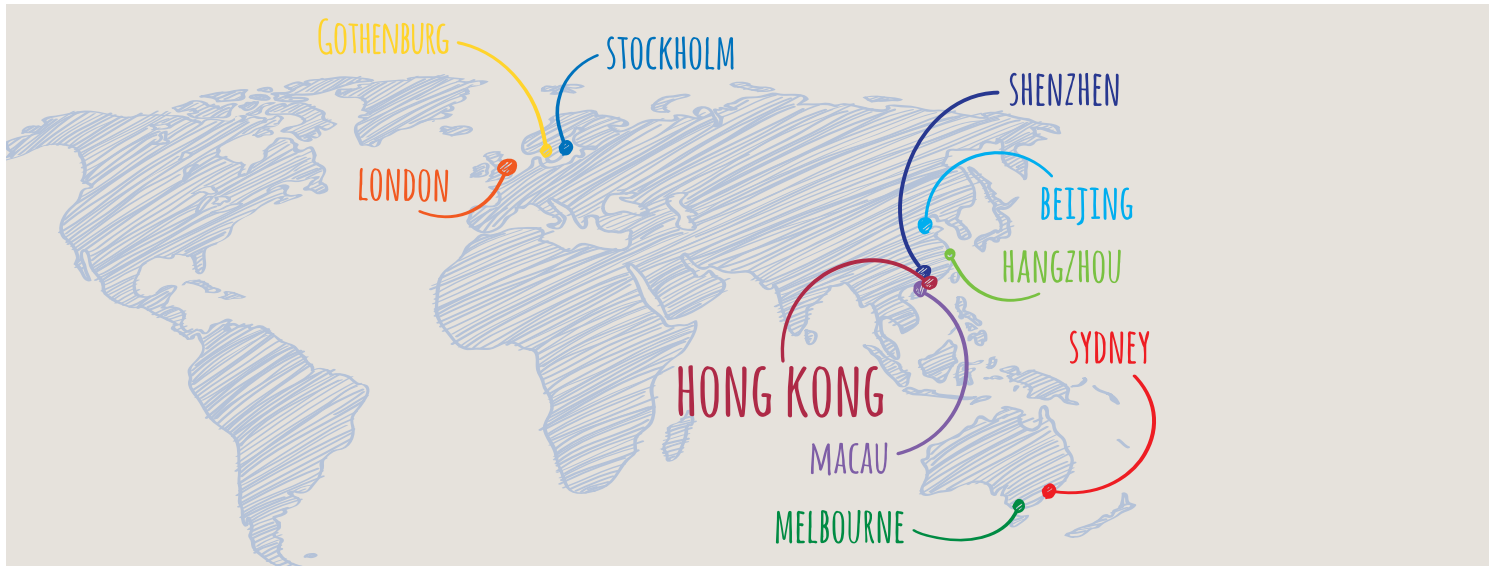

# We make your trip a better experience

Our **MISSION** is to make people's everyday lives easier through convenient journeys, attractive, functional station areas and caring service.

A man with a mustache and afro, wearing a grey polo shirt and black work gloves, is leaning over a car engine in a factory setting. He is focused on his work. The background shows a large industrial space with blue and red shelving units and various mechanical parts.

# Our values are central to everything we do

Our **VALUES** are the common theme in our daily work; excellent service, continuous improvement, mutual respect and value creation. They help us to provide safe and punctual journeys, satisfy our customers and engage our employees.

## MTR around the world

MTR Corporation started its first train service in Hong Kong in 1979 and is today one of the world's leading railway companies. We want to be an integrated part of the community and contribute to sustainable and liveable cities where people want to live and work.

We create value for the community and for the company – which is vital for further development. Value is created by delivering safe journeys, a sustainable environment and by giving our employees possibilities to grow. Today, MTR Corporation has 45,000 employees and each day we help close to 13 million people to reach their destination, on time and with the best possible service.

# MTR in the Nordic Region

MTR is one of Stockholm's largest employers. 5,000 people with backgrounds from more than 100 countries work with us. We operate Stockholm metro and commuter rail services in Stockholm on behalf of SL (Stockholm Public Transport Authority). We perform rolling stock maintenance within MTR Tech and operate intercity trains between Stockholm and Gothenburg with MTR Express.

We are Sweden's largest railway company in terms of passenger numbers and in Stockholm 1 million people are dependent on our services to make their everyday life work.

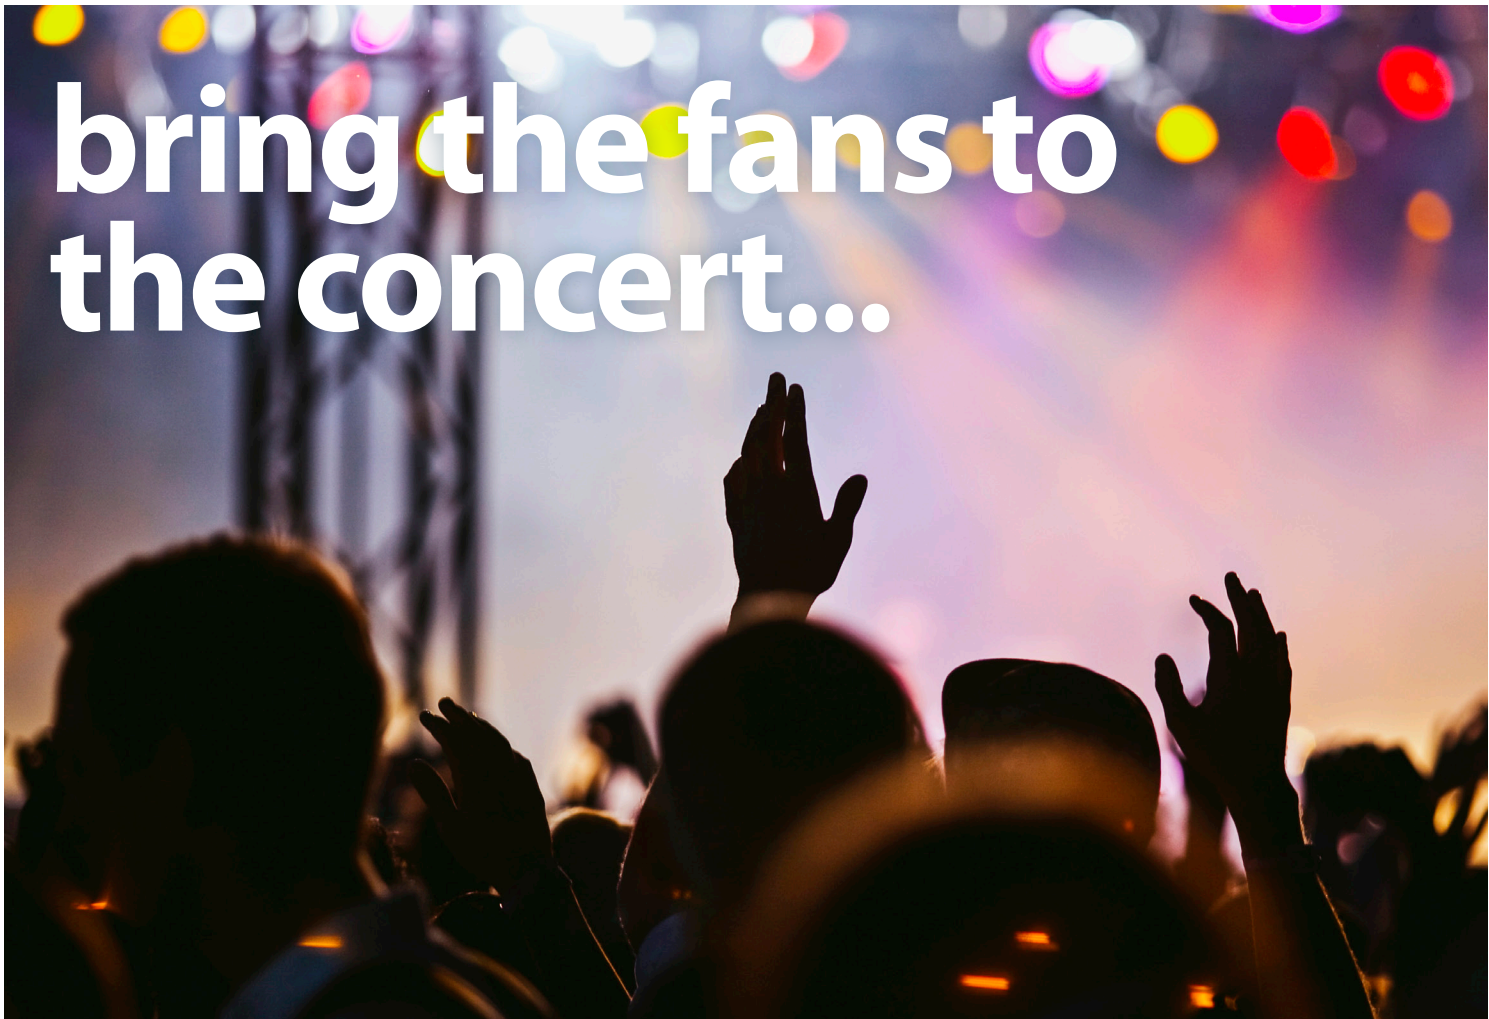

A person who leaves the car at home and takes the metro or train instead can reduce their carbon footprint by about one quarter.

A photograph of a young girl with light brown hair and a black turtleneck sweater smiling at an elderly woman with white hair and glasses. The woman is wearing a patterned scarf and is also smiling. The background is a blurred green outdoor setting.

**We connect  
families...**

**bring the fans to  
the concert...**

**and make  
sure Anna is  
in time for  
her meeting**

**Our journey  
continues...**

# A railway company with ambitions in the Nordic Region

We aim to be the leading railway company in the Nordic Region.

- We shall offer our passengers world class service and experiences.
- We shall be a reliable partner and be known for our innovative services. We challenge old truths and find new solutions.
- We shall be an attractive employer that is well known for its good leadership and the possibilities we offer people to work and grow in an international environment.

At MTR, we can all make a difference – for a sustainable world, in people’s everyday life, at work and in our own lives.

We want to develop and expand our operations to new business areas and new markets. Train

operations and rolling stock maintenance are our core business and we see exciting opportunities throughout the Nordic Region.

The infrastructure is an important component for the railway systems to work well. MTR wants to engage in the development of all parts of the railway, which means, among others, that we consider alternative solutions for time and cost efficient investments in infrastructure, including the entire process from design to operations and maintenance.

Another interesting business area is property development. Locations with close access to public transport are attractive and MTR has unique experience in seamlessly connecting property development to public transport. Sustainable urban development linking public transport with services, work places, shops and housing is an important part of MTR’s growth and global success.
